

SmartSolar Charge Controllers MPPT 100/30 & 100/50

www.victronenergy.com

Bluetooth Smart built-in: dongle not needed

The wireless solution to set-up, monitor and update the controller using Apple and Android smartphones, tablets or other devices.

For a wired data connection to a Color Control panel, Venus GX, PC or other devices

Ultrafast Maximum Power Point Tracking (MPPT)

Especially in case of a clouded sky, when light intensity is changing continuously, an ultra-fast MPPT controller will improve energy harvest by up to 30% compared to PWM charge controllers and by up to 10% compared to slower MPPT controllers.

Advanced Maximum Power Point Detection in case of partial shading conditions

If partial shading occurs, two or more maximum power points may be present on the power-voltage curve.

Conventional MPPTs tend to lock to a local MPP, which may not be the optimum MPP.

The innovative BlueSolar algorithm will always maximize energy harvest by locking to the optimum MPP.

Outstanding conversion efficiency

No cooling fan. Maximum efficiency exceeds 98%.

The full output current up to 40°C (104°F).

Flexible charge algorithm

Fully programmable charge algorithm (see the software page on our website), and eight pre-programmed algorithms, selectable with a rotary switch (see manual for details).

Extensive electronic protection

Over-temperature protection and power derating when temperature is high.

PV short circuit and PV reverse polarity protection.

PV reverse current protection.

Internal temperature sensor

Compensates absorption and float charge voltage

for temperature.

Real-time data display options

- Apple and Android smartphones, tablets and other devices.
- Color Control panel.

Smart Solar Charge Controller	MPPT 100/30	MPPT 100/50					
Battery voltage	12/24V Auto Select						
Rated charge current	30A	50A					
Nominal PV power, 12V 1a,b)	440W	700W					
Nominal PV power, 24V 1a,b)	880W	1400W					
Maximum PV open circuit voltage	100V	100V					
Max. PV short circuit current 2)	35A	60A					
Maximum efficiency	98%	98%					
Self-consumption	12V: 30 mA 24V: 20 mA						
Charge voltage 'absorption'	Default setting: 14,4V / 28,8V (adjustable)						
Charge voltage 'float'	Default setting: 13,8V / 27,6V (adjustable)						
Charge algorithm	multi-stage adaptive						
Temperature compensation	-16 mV / °C resp32 mV / °C						
Protection	Battery reverse polarity (fuse, not user accessible) PV reverse polarity Output short circuit Over temperature						
Operating temperature	-30 to +60°C (full rated output up to 40°C)						
Humidity	95%, non-condensing						
Data communication port	VE.Direct See the data communication white paper on our website						
ENCLOSURE							
Colour	Blue (RAL 5012)						
Power terminals	16 mm ² / AWG6						
Protection category	IP43 (electronic components), IP22 (connection area)						
Weight	1,3 kg						
Dimensions (h x w x d)	130 x 186 x 70 mm						
STANDARDS							
Safety	EN/IEC 62109-1, U	JL 1741, CSA C22.2					

1a) If more PV power is connected, the controller will limit input power. 1b) The PV voltage must exceed Vbat + 5V for the controller to start.

2) A PV array with a higher short circuit current may damage the controller.

Thereafter the minimum PV voltage is Vbat + 1V.
